

10 November 2016

To Whom It May Concern:

The Lawrence, Kansas Public Schools (USD 497) is pleased to provide this letter of support for "Collaborative Research: The Effect of Filaments on the Gas in Galaxies" being proposed by Gregory Rudnick (University of Kansas) and Rose Finn (Sienna College). The proposed project is fully supported by Lawrence Public Schools' Teaching and Learning Department.

Further, this proposal is fully supported by the administration of Lawrence High School and the Science Department members. This project proposes to engage students at higher levels of participation and learning, which meets many of our school district's Teaching and Learning Goals.

We look forward to participating in the implementation of this project within the scope of our senior high school science programs.

Respectfully,

A handwritten signature in black ink, appearing to read "Terry O. McEwen", with a large, sweeping flourish extending to the right.

Terry O. McEwen, Ph.D.
Director of Curriculum, Instruction, & Assessment
USD 497 – Lawrence Public Schools
